UC10 | USB Speakerphone for Microsoft Lync® & Unified Communications.

# UC10 Speakerphone

UNIFIED COMMUNICATION

Designed to work perfectly with Microsoft® Lync, the UC10 conference-use speakerphone is the latest unified communication device from Accutone®. Utilizing one of the market's best digital audio processor for audio conference, the UC10 has excellent audio performance as well as elite echo-cancellation.

Comes with a hook switch that works seamlessly with Lync, making or ending calls can be done entirely on the device. Digital volume control, speaker mute as well as microphone mute are also built to work natively and independently with the Lync system.

A true business necessity in for executives within office or on the go, the UC10 is also a portable design, with USB cable compartment in the back of the device, which also acts as a desktop stand.

UC10 also comes with LED-status-indication and external headphone jack.
